Nicholas Kyriazis

Junior Software Engineer | Computer Science student @ HOU
Athens Metropolitan Area

Summary

I am currently immersed in a transformative journey, enhancing my skills as an entry-level Full-stack Developer at Coding Factory, an initiative in partnership with Athens University of Economics and Business. Here, I am entrusted with crafting web applications tailored to address real-world challenges. Collaborating closely with a proficient team of developers and researchers, I actively participate in the entire software development lifecycle, from conceptualization to deployment. My diverse toolkit encompasses a spectrum of technologies, including Java, HTML, CSS, JavaScript, Python, MySQL, MongoDB, Angular, and JUnit. Noteworthy among our recent endeavors are the creation of enterprise applications and the development of scripts for automated tests.

Simultaneously, I am advancing my knowledge through my pursuit of a Bachelor of Technology in Software Engineering (currently in my 3rd year) at Hellenic Open University. Here, my focus extends to programming paradigms, data structures, algorithmic principles, automation techniques, network architectures, and the foundational principles of discrete mathematics.

My educational trajectory mirrors a rich tapestry of interests and expertise spanning engineering, computer science, and psychotherapy. During my studies in Electrical and Electronics Engineering at Manchester Metropolitan University, I acquired a robust understanding of circuit design, signal processing, embedded systems, control engineering, microprocessors, and digital electronics. Furthermore, my academic journey includes the attainment of a Diploma of Education in Mental Health Counseling/ Counselor from the esteemed Hellenic Institute of Character Analysis - "Wilhelm Reich".

This synthesis of technical proficiency and psychological insight equips me with a profound comprehension of human dynamics, emotions, and behaviors.

My ultimate aspiration is to synergize my technical acumen and innovative spirit with my empathetic understanding and psychological insights to develop software solutions that enrich the lives and well-being of individuals.

Experience

Cognitera S.A.

Junior Software Engineer

April 2024 - Present (4 months)

Coding Factory - Athens University of Economics and Business

Full-stack Developer

October 2023 - April 2024 (7 months)

Athens, Attiki, Greece

Self Employed

4 years 3 months

Ecommerce Specialist

May 2020 - April 2024 (4 years)

Information Technology Specialist

February 2020 - April 2024 (4 years 3 months)

Education

Elliniko Anoikto Panepistimio

Bachelor of Technology - BTech, Computer Software

Engineering · (2020 - 2026)

Athens University of Economics and Business

Computer Science · (May 2024)

Hellenic Institute of Vegetotherapy & Character Analysis - "Wilhelm Reich" Center of Athens

Diploma of Education, Mental Health Counseling/Counselor · (October 2010 - July 2015)

The Manchester Metropolitan University

Master of Engineering - MEng, Electrical and Electronics
Engineering · (October 2004 - June 2008)
